

PROCESSES AND POLYMORPHS OF DIARYL-INDOLONE GALR3

ANTAGONISTS

5 **Abstract Of The Disclosure**

This invention relates to crystalline forms, as well as  
an amorphous form of Compound I [1-phenyl-3-[[3-  
(trifluoromethyl)phenyl]imino]-1H-indol-2-one], the  
10 processes for their preparation, compositions containing  
the same and the therapeutic use of such compositions.  
This invention further relates to a process for  
preparing Compound I.
